Microsoft Data Center Moving Along as Scheduled

MICROSOFT is here...really! If you drive out west of town, you can see Microsoft continuing construction throughout the winter months on the $112 million data center. By spring passers-by will be able to view work being completed above ground. This data center will serve the Mountain West region for Microsoft. The company will build the data center in phases and will eventually employ approximately 40 people. The first phase will result in the creation of 17 new jobs with median wages that are 150% above the county's average wage. Microsoft expects to have the facility operational in the spring of 2013.

Cheyenne LEADS and the Wyoming Business Council worked closely with Microsoft and its location scouts to solidify the new data center location. With that, it is important to understand that this is a competitive process and Wyoming must continue to ensure it is positioned to attract more data centers and technology companies.

Microsoft will be great community partners and will hopefully find Cheyenne a wonderful place in which to thrive and expand. The support of the communities and local economic development officials from across the state that helped during this process is greatly appreciated.

Manufacturing Facility, Searing Industries, Expanding into Cheyenne

SEARING INDUSTRIES, headquartered in Rancho Cucamonga, California is expanding and has announced it will locate a new 200,000 square foot manufacturing facility in Cheyenne producing welded steel tubing, with a state of the art tube mill and steel coil slitter. The new manufacturing facility will be located on rail-served acreage in the Swan Ranch Rail Park, a Granite Peak development. Construction has already started on the facility which is slated to be completed the third quarter of 2013. Richardson Construction of Cheyenne is the general contractor.
Cheyenne LEADS began conversations with Searing Industries in March 2012. LEADS has since partnered with Granite Peak in creating a package to assist Searing Industries with the expansion. Once operational, the facility will initially employ approximately 50 people, and have the capability to produce pieces ranging from custom tubing for furniture or motorcycles up to structural tubing used in construction.

Searing Industries was founded in 1985 by Richard, Lee and Jim Searing. Richard Searing was one of the first employees ever to run a tube mill in the United States dating back to 1948. He went on to become the President and Owner of three different tubing operations before finally starting Searing Industries along with his two sons, before passing away in 1998. The company has continued to excel with the leadership of brothers, Jim and Lee Searing. “We look forward to the opportunity to expand into the Cheyenne community and continuing to serve clients from the Cowboy State,” said Lee Searing, President of Searing Industries.

The company located to Rancho Cucamonga, California in 1991 and today runs five mechanical tube mills, a structural mill, cutting, chamfering and deburring equipment, slitting, laser capabilities and paint lines. Searing has been able to partner with some of the most skilled employees in the trade. Priding itself on quality, expertise and service, Searing Industries has developed into one of the country’s most respected and sought after manufacturers on the West Coast.

Microsoft Data Plant Will Bring Pioneering Technology

MICROSOFT’S Data Plant Demonstration Project to convert waste water by-products into a data center energy source is under way east of Cheyenne at the Dry Creek Water Reclamation Facility (Dry Creek).

Microsoft believes it can capture natural by-products like biogas directly from wastewater treatment plants, agricultural farms, fuel refineries, waste landfill sites, etc. and use it to power data servers. The Demonstration project will serve as a research site to test the Data Plant concept before it can be used in production data centers running Microsoft’s more than 200 online services.

The Data Plant’s 300-kilowatt fuel cell needed for this project will be powered by methane/biogas produced from wastewater at the Cheyenne Dry Creek facility. The fuel cell, provided by Fuel Cell Energy Inc., will, in turn, provide about 200 kilowatts of energy to power the Data Plant’s 200 computer servers. Excess electricity from the fuel cell will be delivered back to Dry Creek to reduce its electrical bills. The heat from the fuel cell will also be used in the waste water plant’s anaerobic digesters, where the biogas is generated. The servers will run workloads from the University of Wyoming, which is partnering with Microsoft on the project.

Although the workload is just a fraction of the size of Microsoft’s cloud data centers, which can require upwards of 50 megawatts of power capacity, the knowledge acquired from the $8 million investment in the Cheyenne project will allow the company to model how the technology will work in a larger facility. Not only does Microsoft hope to bring computer and renewable energy infrastructure closer together, but also to expand the universe of power sources beyond traditional electric utilities, which will allow Microsoft to approach its infrastructure differently.

“With the Cheyenne research and development project, we are moving closer to the goal of a highly-available, net-zero CO2, scalable, and cost efficient data center,” said Sean James, Senior Research Program Manager.

continued on page 3
This Data Plant project will help provide a bold new paradigm for future data center infrastructures that will recycle waste to power delivery of cloud services.”

This project was initiated in the summer of 2012 when the Wyoming Business Council (WBC) came across a Microsoft blog discussing interest and research into alternative fuel sources for their data centers. As the WBC and LEADS had existing relationships with Microsoft through work on the Microsoft data center, the Wyoming team initiated phone calls and meetings to determine whether what Wyoming could offer would meet Microsoft’s alternative fuel needs. After initial exploratory conversations, Microsoft decided to investigate the opportunities in the cowboy state further.

Hosted by Cheyenne LEADS, various players came together in August 2012 for the first kick-off meeting with representatives from Microsoft, FuelCell Energy, the University of Wyoming, Western Research Institute, Cheyenne’s Board of Public Utilities, the WBC, Cheyenne Light, Fuel & Power, and Cheyenne LEADS. After presentations and touring the Dry Creek facility, Microsoft determined that Cheyenne would be the location to have their Data Plant Demonstration Project. Cheyenne LEADS took the lead on coordinating the Wyoming parties for the project, and submitted a Business Ready Community grant application for $1.5M to the WBC to help defray some of the cost of the necessary infrastructure for the $8M Project. The grant was fully approved in December 2012, further paving the way for continued progress on the project. Completion of construction is slated for March 2013, while research at the facility will continue for roughly eighteen months.

2013 Annual Membership Meeting and Banquet

April 19, 2013

Holiday Inn ~ Cheyenne, WY

6:00pm Cocktails ~ 7:00pm Dinner

Keynote Speaker

Janet Ady, President & CEO

Ady Voltedge
Board of Directors Update
Welcome to our newest Elected & Appointed Board members

Dr. Joe Schaffer took over as the Laramie County Community College representative on the board in October 2012. Dr. Schaffer joins the LEADS board as the President of LCCC, Wyoming’s largest community college. Prior to joining LCCC, Dr. Schaffer held many positions at Montana State University-Great Falls, including adjunct faculty, Director of Outreach, Asst Dean of Outreach and Workforce Development, and Associate Dean/Chief Academic Officer. From 2008 to 2012 he served as the campus’ Dean and CEO. For more than a decade, Dr. Schaffer has owned and operated a website design and internet consulting company.

Joe is an active and engaged supporter in economic development. He served on the Board of Directors for Great Falls Development Authority, has experience in developing and operating business retention/expansion and has been intimately involved in successful business recruitment efforts.

He received his Associate of Arts degree from Bemidji State University, a B.S. in Recreation Resource Management from The University of Montana, a Master of Science in Technical Communication from Montana Tech, and a Doctorate in Educational Leadership from The University of Montana. Dr. Schaffer is an avid outdoorsman, and enjoys spending time recreating with his wife, Brooke, and two daughters, Samantha, 6, and Lia, 2.

Kim E. Lovett was elected to the board in March 2012. Kim is the Executive Director of the Cheyenne Symphony Orchestra. Kim joined the symphony in January 2011 after retirement from the Laramie County Treasurer’s office. The last twelve years of her thirty year career, she was the elected Laramie County Treasurer.

During her tenure as Laramie County Treasurer, Kim was a member of the Wyoming County Treasurer’s Association serving as President for three years. She was also elected to the Wyoming Association of County Officer’s Board of Directors. She held office in the association for seven years until her retirement from county government.

Kim is an active member of the Cheyenne Kiwanis Club holding the office of Assistant Treasurer and Treasurer for over ten years. Additionally she is a Kiwanis Foundation board director and former president of the board.

Kim was born and raised in Wheatland and moved to Cheyenne in 1979 after graduating from the University of Wyoming, in Accounting. Her husband Brian works for the State of Wyoming Dept of Environmental Quality. Kim and Brian love Wyoming and Cheyenne living!
Board of Directors Update
Welcome to our newest Elected & Appointed Board members

John Hostetter took over as the Wells Fargo appointed board member in November 2012. A 20-year Wells Fargo veteran, John Hostetter has 26 years of experience in the financial services industry. He was named Community Bank President for Pagosa Springs in April 2000. During his tenure in Pagosa Springs, Wells Fargo became the leading financial institution in the community. Prior to moving to Pagosa Springs, he was a Business Banking Manager for Colorado Springs.

In Colorado, Hostetter worked on developing strategic success plans for each banker to help them uncover needs for clients and new lending strategies to help bankers reach and exceed goals in a rapidly changing environment.

“Wyoming is a state of incredible diversity and an emphasis on rural markets, which is how I’ve built my career,” he said. “It’s a place with strong entrepreneurism and community identity, and a state where we have rich opportunity to grow households and deepen relationships.

Hostetter, a native of Colorado, has been actively involved in the community throughout his career. He serves as a member of the Colorado Mountain College Foundation Board, the Vail Leadership Institute Leaders Council, the Youth Foundation Board, the Roundup River Ranch Advisory Council and as a troop leader for Boy Scouts of America.

Paul Panicotook over as the Cheyenne Regional Medical Center (CRMC) appointed board member in February 2012. Mr. Panico, PhD, FACHE, is the Executive Vice-President & COO at CRMC. In his role, Paul has overall responsibility for all hospital operations including executive oversight of the specific implementation. He joined CRMC in September of 2008 and has over 20 years of experience in healthcare executive leadership. Dr. Panico earned his doctorate in Psychology from Colorado State University and his MBA from the University of Delaware. He also is a Fellow in the American College of Healthcare Executives.

Prior to joining CRMC, he served in senior leader roles with numerous healthcare organizations, including Banner Health, Lutheran Health Systems, and North Colorado Medical Center. Prior to his health care career, Paul served in the teaching and research fields having held faculty appointments at both Boulder and Denver campuses of the University of Colorado. More recently, he held an appointment as adjunct professor at Regis University, teaching in the graduate program for Healthcare Management from 2000 to 2007.

Paul and his wife Susan have enjoyed 35 years of marriage and have two grown sons, both of whom reside and work in northern Colorado. Their outside interests include gardening (with Susan completing her Wyoming master gardener’s course), hiking and biking.
Board of Directors Update

Welcome to our newest Elected & Appointed Board members

Phil Van Horn was elected as a board member in March 2012. Capitalizing on almost thirty years of management and leadership, Van Horn led the formation of Western States Learning Corporation d/b/a Align® in 2004, a non-profit corporation dedicated to helping others achieve success. For three decades Van Horn has taught a multitude of courses focusing on areas of leadership as well as facilitating strategic planning efforts many organizations. He has more than ninety aggregate years of experience serving on local, statewide, regional and national boards of directors. He has authored or co-authored three journal articles published in the Pfeiffer Annual of Consulting.

Van Horn served on the Wyoming Governor’s Workforce Development Council form 1999 through 2007, and was appointed Chairman by the Governor from 1999 -2002. He has also been actively involved in many professional associations serving in various capacities including boards of directors, committee chair, training and instruction and elective office. He currently serves on the National Council of Higher Education Loan Programs (NCHELP) Board of Directors and was Chairman for 2006-2007.

Van Horn has been actively involved in many community activities and was named the Greater Cheyenne Chamber of Commerce (GCCC) Person of the Year for 2001. His community service includes serving six years on the GCCC board of directors, twelve years on the board of directors for the Cheyenne Board of Public Utilities (BOPU), thirty years as a Cheyenne Frontier Days volunteer, is a past president of the board of directors for the Cheyenne Frontier Days (CFD) Old West Museum and is president of the CFD Memorial Scholarship Foundation. Van Horn is also a past-president of the Cheyenne Kiwanis Club and is currently Chairman of the Board of Wyoming Student Loan Corporation.

Greg Dyekman was appointed by the board to fill the remaining term of Bob Harmon, who resigned in 2012. Mr. Dyekman, a Wyoming native, received his B.A. in Accounting from the University of Wyoming as well as his law degree from the University of Wyoming - College of Law. Dyekman has practiced with Dray, Dyekman, Reed & Healy P.C. his entire career, obtaining a very broad experience. Greg received the “AV” rating from Martindale Hubbell, is included in the Best Lawyers in America/US News and World Report, and has been recognized by Chambers and Partners as one of Wyoming’s top lawyers in real estate and corporate law.

Greg is a member of the Wyoming State Bar, the American Academy of Appellate Lawyers, Wyoming Trust Lawyers Association, and American Inns of Court - Ewing T. Kerr. Dyekman sits as Chairman for the Wyoming State Bar’s Law School Liaison Committee.

The CRMC Foundation develops and stewards resources that support Cheyenne Regional Medical Center in providing access to the best regional healthcare available. The resources that are developed go toward caring for new life, ensuring a healthier future through treating those who are ill, and caring with dignity for those who are dying while supporting the caregivers.

It is believed that through philanthropic support of the Cheyenne Regional Medical Center, the quality of life for our patients and loved ones will be enhanced.
**LEADS Members In The News**

**Sierra Trading Post sells to TJX Companies**

Sierra Trading Post, a catalog and internet retailer with two stores located in Wyoming - Cheyenne and Cody - as well as in ID and NV, recently announced the sale of the business to TJX Companies for $200 million in cash. TJX, the owner of T.J. Maxx, Marshalls and HomeGoods, said the deal will expand its online business. The international retailer is in the midst of developing online shopping sites for its own brands and said the acquisition adds scale and infrastructure in e-commerce that can benefit its business. The deal includes Sierra’s main office, fulfillment center, photography studios, customer call centers and four outlet stores. TJX said the acquisition of Sierra Trading Post will add slightly to earnings beginning in fiscal 2014. The plans are for Sierra Trading Post to continue operating as its own brand and to remain in Wyoming.

Sierra Trading Post specializes in name brand outdoor clothing and equipment at 35-70% off regular retail. Sierra has been in business 26 years - 20 of those have been in Cheyenne. They were one of the first businesses to take advantage of land in the LEADS owned Cheyenne Business Parkway in 1992, and started with 40 some employees. Sierra has expanded three times since opening the original facility. The most recent being a 350,000 square foot fulfillment center. Currently Sierra employees over 650 employees in Cheyenne.

Sierra Trading Post has been a member of Cheyenne LEADS for 20 years. The company has benefited from that relationship and has seen other company’s benefit in similar ways. Ultimately, LEADS has had a significant impact to the community and the prosperity of many individuals. Cheyenne has been a good home for Sierra and the groups looks forward to new opportunities.

**Green House Data Continues to Expand**

Green House Data is keeping busy with new expansions and partnerships. Most recently announced, Green House Data will be expanding into the East Cost. Partnering with DuPont Fabros Technology and Net2EZ, the Newark gBlock cloud will provide a cornerstone for nationwide access to production cloud environments and cloud disaster recovery. Green House Data brings the same customer service standards, competitive pricing, and sustainability efforts to Newark as in the company’s other locations in Cheyenne, Wyoming and Portland, Oregon.

The move grows the Green House Data cloud to cover the United States from coast to coast, ensuring excellent access in North America and Europe, and providing cloud infrastructure as a service option to those organizations who must have low latency, high performance access to their applications at all times.

Additionally, Green House Data recently partnered with Cheyenne Regional Medical Center(CRMC) for colocation services at Green House Data’s Cheyenne facility. As healthcare adapts to a more digitized world, more and more patient records and information are being converted to or created in digital formats. In 1996,
Congress passed the Health Insurance Portability and Accountability Act (HIPAA), which set standards in place for the security of Protected Health Information. Given the exponential increase in digital files, hospitals have looked to HIPAA compliant providers, like Green House Data, who have completed a rigorous validation process conducted by an independent auditing firm who issues a compliance check across 54 administrative, physical, and technical safeguard areas.

The Cheyenne Regional Medical Center expansion is well under way. If driving down Warren Avenue, the construction is hard to miss. With this massive project comes a 30 million state-of-the-art cancer center also including a six-story patient tower, two-story parking garage, new Intensive Care unit, mother-baby unit, and a new emergency department.

The goal of the expansion is not only to offer more space for patients, but also to increase the edge of CRMC. The cancer center will make CRMC competitive in the region by offering the highest quality treatment in a central location so patients will stay in Cheyenne rather than going elsewhere. The Cheyenne hospital gets about 450 cases of cancer a year, and not all are treated in Cheyenne. Some patients choose to do nothing, while others go outside of Cheyenne for what they assume will be better treatment. Cheyenne Regional Medical Center is hoping to change that. The hospital is working incredibly hard to show itself as a prestigious, highly capable facility. Additionally, CRMC is accredited by the American College of Surgeons Commission on Cancer accreditation.

CRMC came into the Cheyenne community in 1867 as a frontier “tent” hospital constructed by the Union Pacific Railroad to treat workers who were injured building the transcontinental railroad. One year later, the founders of Cheyenne purchased the tent and all of medical supplies for $125.00 and created what is known today as Cheyenne Regional Medical Center. As time passed, the buildings grew, the name changed and changed again. Through all of this, CRMC has continued to develop and today, CRMC is the 5th largest employer in Laramie County with over 1700 employees. We wish them well in this new endeavor.
