

POWERING THE FUTURE

LARGE POWER CONTRACT SERVICE (LPCS)

Powering growth. Protecting our community.

Delivering smart energy solutions that put our customers and communities first.

What this means for you

No cost shifting

- Large use customers pay their own way – no added costs to existing customers

Reliable service

- Big energy users provide their own backup power resources
- Customers benefit from investments from large energy users

Rate protection

- Safeguards protect customers from cost impacts

How it works

- Available to customers using **13+ MW**
- Customers secure their own **electric generation**
- Includes access to **renewable energy**

Why it matters

Supports projects like data centers without impacting your bill – balancing growth with responsibility.

Community benefits

Fairness first

- Large energy users pay for their own service

Economic growth

- Attracts major employers and investment

System strength

- Reduces risk and strain on the grid

Sustainability

- Supports expanded renewable energy use

In place for over a decade

- Supports jobs and local investment
- Maintains reliability for all customers
- Creates transparency and accountability through Wyoming Public Service Commission
- Developed in partnership with Microsoft in 2016
